

Without spring

```
class MusicPlayer {
  constructor(wifi) {
    this.wifi = wifi;
  }
  play() {
    // ...
  }
}

class MusicController {
  constructor(wifi) {
    this.wifi = wifi;
  }
  play() {
    // ...
  }
}
```

Dependency
tree
messy

MusicPlayer
is
responsible
for setup

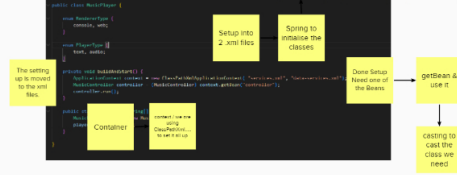

As well as
playing the
music
